SPECTRAVISION INFORMED CONSENT

The human body is an energetic organism, and the balanced flow of electrons through the body informs optimal health. When vital life force energy is used for stress management (such as food or substance sensitivities, ongoing emotional trauma or ongoing physical symptomology), less energy is available to maintain deeper degrees of homeostasis. Stress creates interferences with metabolic processes, which in turn uses up vital force energy and lowers the overall electrical flow within the body. The loss of energy created by continually managing toxic burdens eventually weakens defenses, causing impaired healing and reduced immunity.

The SpectraVision Scan

The Spectra Vision uses a non-cognitive scan to assess the body's response to hundreds thousands of specific resonant frequencies of many different substances, through the lens of energetic stress patterns of the organs and systems of the body. Through introducing safe, non-invasive resonant frequencies of many different substances, the current top stress issues can be identified and addressed.

All of this is accomplished beneath the "conscious" level of awareness, by stimulating the mid-brain to get a clear picture of the body's General Adaptive Capacity. A stress response to an introduced frequency can indicate a positive or negative impact on the body. Categories that have proven to be beneficial form the basis of each scan, and include vibrations of categories such as amino acids, cell salts, flower essences and homeopathic formulas. Scan results are organized according to highest stress response, as shown here:

With the data collected through the scan and client-practitioner conversations, a wholistic picture takes shape: the emotional issues underlying physical symptomology can be understood, and the digital homeopathic signatures to which the body responds most strongly (which denotes weakness towards) are marked. Now, the practitioner seeks to balance blocked energetic pathways by acupoint testing against the selected signatures, to find out how well those signatures (i.e. the recipe) balance the body, at what potencies and dilutions. Once the recipe is confirmed to bio-balance, it is introduced into the body through digital imprinting into our *multidimensional products*, or via Low Level Light Therapy (the information is encoded into laser light and introduced through the auricular points and top of the skull, etc). Treatment with cold lasers takes between 2-20 minutes; imprinted products are taken for up to three weeks after the initial session. All products are natural, vibrational, non-invasive, and proven effective in supporting the body to find balance.

The SpectraVision device is considered an *esoteric technology*. The SpectraVision technologist makes no medical claims or diagnoses. The technologist does not claim that the SpetraVision technology treats, cures, mitigates or prevents any disease or condition. I understand that there are no warranties, assurances or guarantees of successful treatment made to me I desire to undergo this non-cognitive scan after having considered the information contained in this document.
